**Compact on the outside, big on the inside:** Folding down the rear seat opens up extra luggage capacity. Leaving more space to accommodate all kinds of cargo.

**Antilock Brake system:** With electronic Brake-force Distribution helps maintain vehicle stability and driver control when braking. It includes a Brake Assist function that increases the braking force when the brakes are suddenly applied to make an emergency stop.

**Suspension:** Designed to reduce vibration and enhance ride comfort. In addition, sound absorbing and vibration damping materials are adapted throughout the entire body and acoustic glass with 3-layer structure.

**Comfort:** The front /rear seat coupe distance has been increased and front seatbacks have been redesigned, helping secure ample legroom for rear seat occupants.

**SRS Airbags:** Are adapted for the driver's and front passenger's seats. In addition, the body structure efficiency absorbs and distributes energy from frontal and side impacts, helping reduce cabin deformation.
