- Rear privacy glass
- VSC, Mudguards Fr + Rr

**73.4 Cu. Ft. of Cargo Space:** Some of the best adventures happen at the last minute. RAV4 is flexible, with rear seatbacks that easily fold flat for 73.4 cu. ft. of cargo space. Plus, with RAV4's low load-in height, everyone can help get gear in or out.

**Reclining Second-Row Seats:** Treat your friends and family like first-class passengers. By simply pulling a handle, they can recline the seatbacks and enjoy more than 37 inches of leg room.

**Take the wheel:** RAV4's standard tilt/telescopic steering wheel features integrated controls for the things you use most, like the audio system, Bluetooth® 12 hands-free phone and Multi-Information Display.

**In the know:** The cool blue glow of RAV4's instrument cluster makes it easy to read the centrally located speedometer, tachometer and Multi-Information Display.

**Active Safety Features:** Anti-skid Braking System (ABS) to help ensure that you have steering control while braking. Brake Assist (BA) to enhance emergency braking if necessary.

**Hill-start Assist Control (HAC):** Is standard on all RAV4 models. This technology is invaluable when pulling away on steep slopes. It helps to prevent roll back by momentarily holding the car when you release the brake, giving you time to engage gear and pull away safely.
